

\$MILK - the holy asset of the Illumicati global enterprise, the only asset you need really.

MILK gives power of infinite gains and is truly the future of finance. Illumicati DAO, a profit driven marketing DAO with a centralized base in the nordics, has committed a good portion of their revenue directly to MILK stakers. It's VERY simple; buy MILK get ETH.

As a holder of MILK you will be first in line to receive free or at a VERY large discount ANYTHING the Illumicati ecosystem releases. ERC-20 tokens, BRC-20s, NFTs, Ordinals, Airdrops, don't worry we got you!

Got MILK? - Good kitty. Just sit back, relax and enjoy as we run this to the top tokens on Coingecko and Coinmarketcap.

Btw. Sometimes MILK can get sour in your wallet. Burn the sour MILK here: `0x00dEaD`
Doing so usually puts you in a favourable position, it might also trigger larger burns from the burn multisig.

Why you should join the Illumicati!
The cats behind is the same as Nibiru Software, who brought you the largest P2E on Polygon & other successful projects!
Check them out here: www.nibiru.se.

To make sure no cats go against the establishment, it's of course important to point out that MILK is a meme coin with no intrinsic value or expectation of financial return. There is NO official team or roadmap. The coin is completely useless and for entertainment purposes only. Nothing that the Illumicati ever communicates should be taken as financial advice or any kind of advice actually.

May your bowls forever be filled,

Illumicati
